Project
25 Variations, Phase 2

Instructions

Now that you've made at least a first pass on the 25 Variations, please create a navigation system for them. Your navigation system should contain:

1. A landing page.
2. A consistent navigation device present on each variation.
3. *Optional:* A cover page for each level, describing the level's parameters.

Your landing page should…
— Contain links to all 25 variations.
— Act as a "cover" to your project. The visuals should be somehow informed by the poem's contents.

Your consistent page device should…
— Contain next and previous links to the next and previous variation.
— Be relatively subtle; not interfere with the visual priority of the poem.
— Be relatively the same on each page.
— In some way be visually connected or resonate with your landing page.

Your optional cover page could do any or all of these…
— State the level.
— Describe its parameters.
— Provide visual intermission or rest.

Somewhere within all these pages you should have...
— Poem credit (Yoko Ono, date).
— Poem title.
